

CGIAR Scaling for Impact (S4I) Program

Latin America and the Caribbean

Through spaces for exchange, learning, and collective construction, key actors from Latin America and the Caribbean –governments, organizations, institutions, and communities– came together to reflect on how to bring successful innovations to more territories and people in order to:

- Build a common language around scaling.
- Identify collective opportunities.
- Strengthen capacities to drive lasting change.

Total Attendance: **51 people**

▶ In total, representatives from **35 institutions** across countries in the region participated.

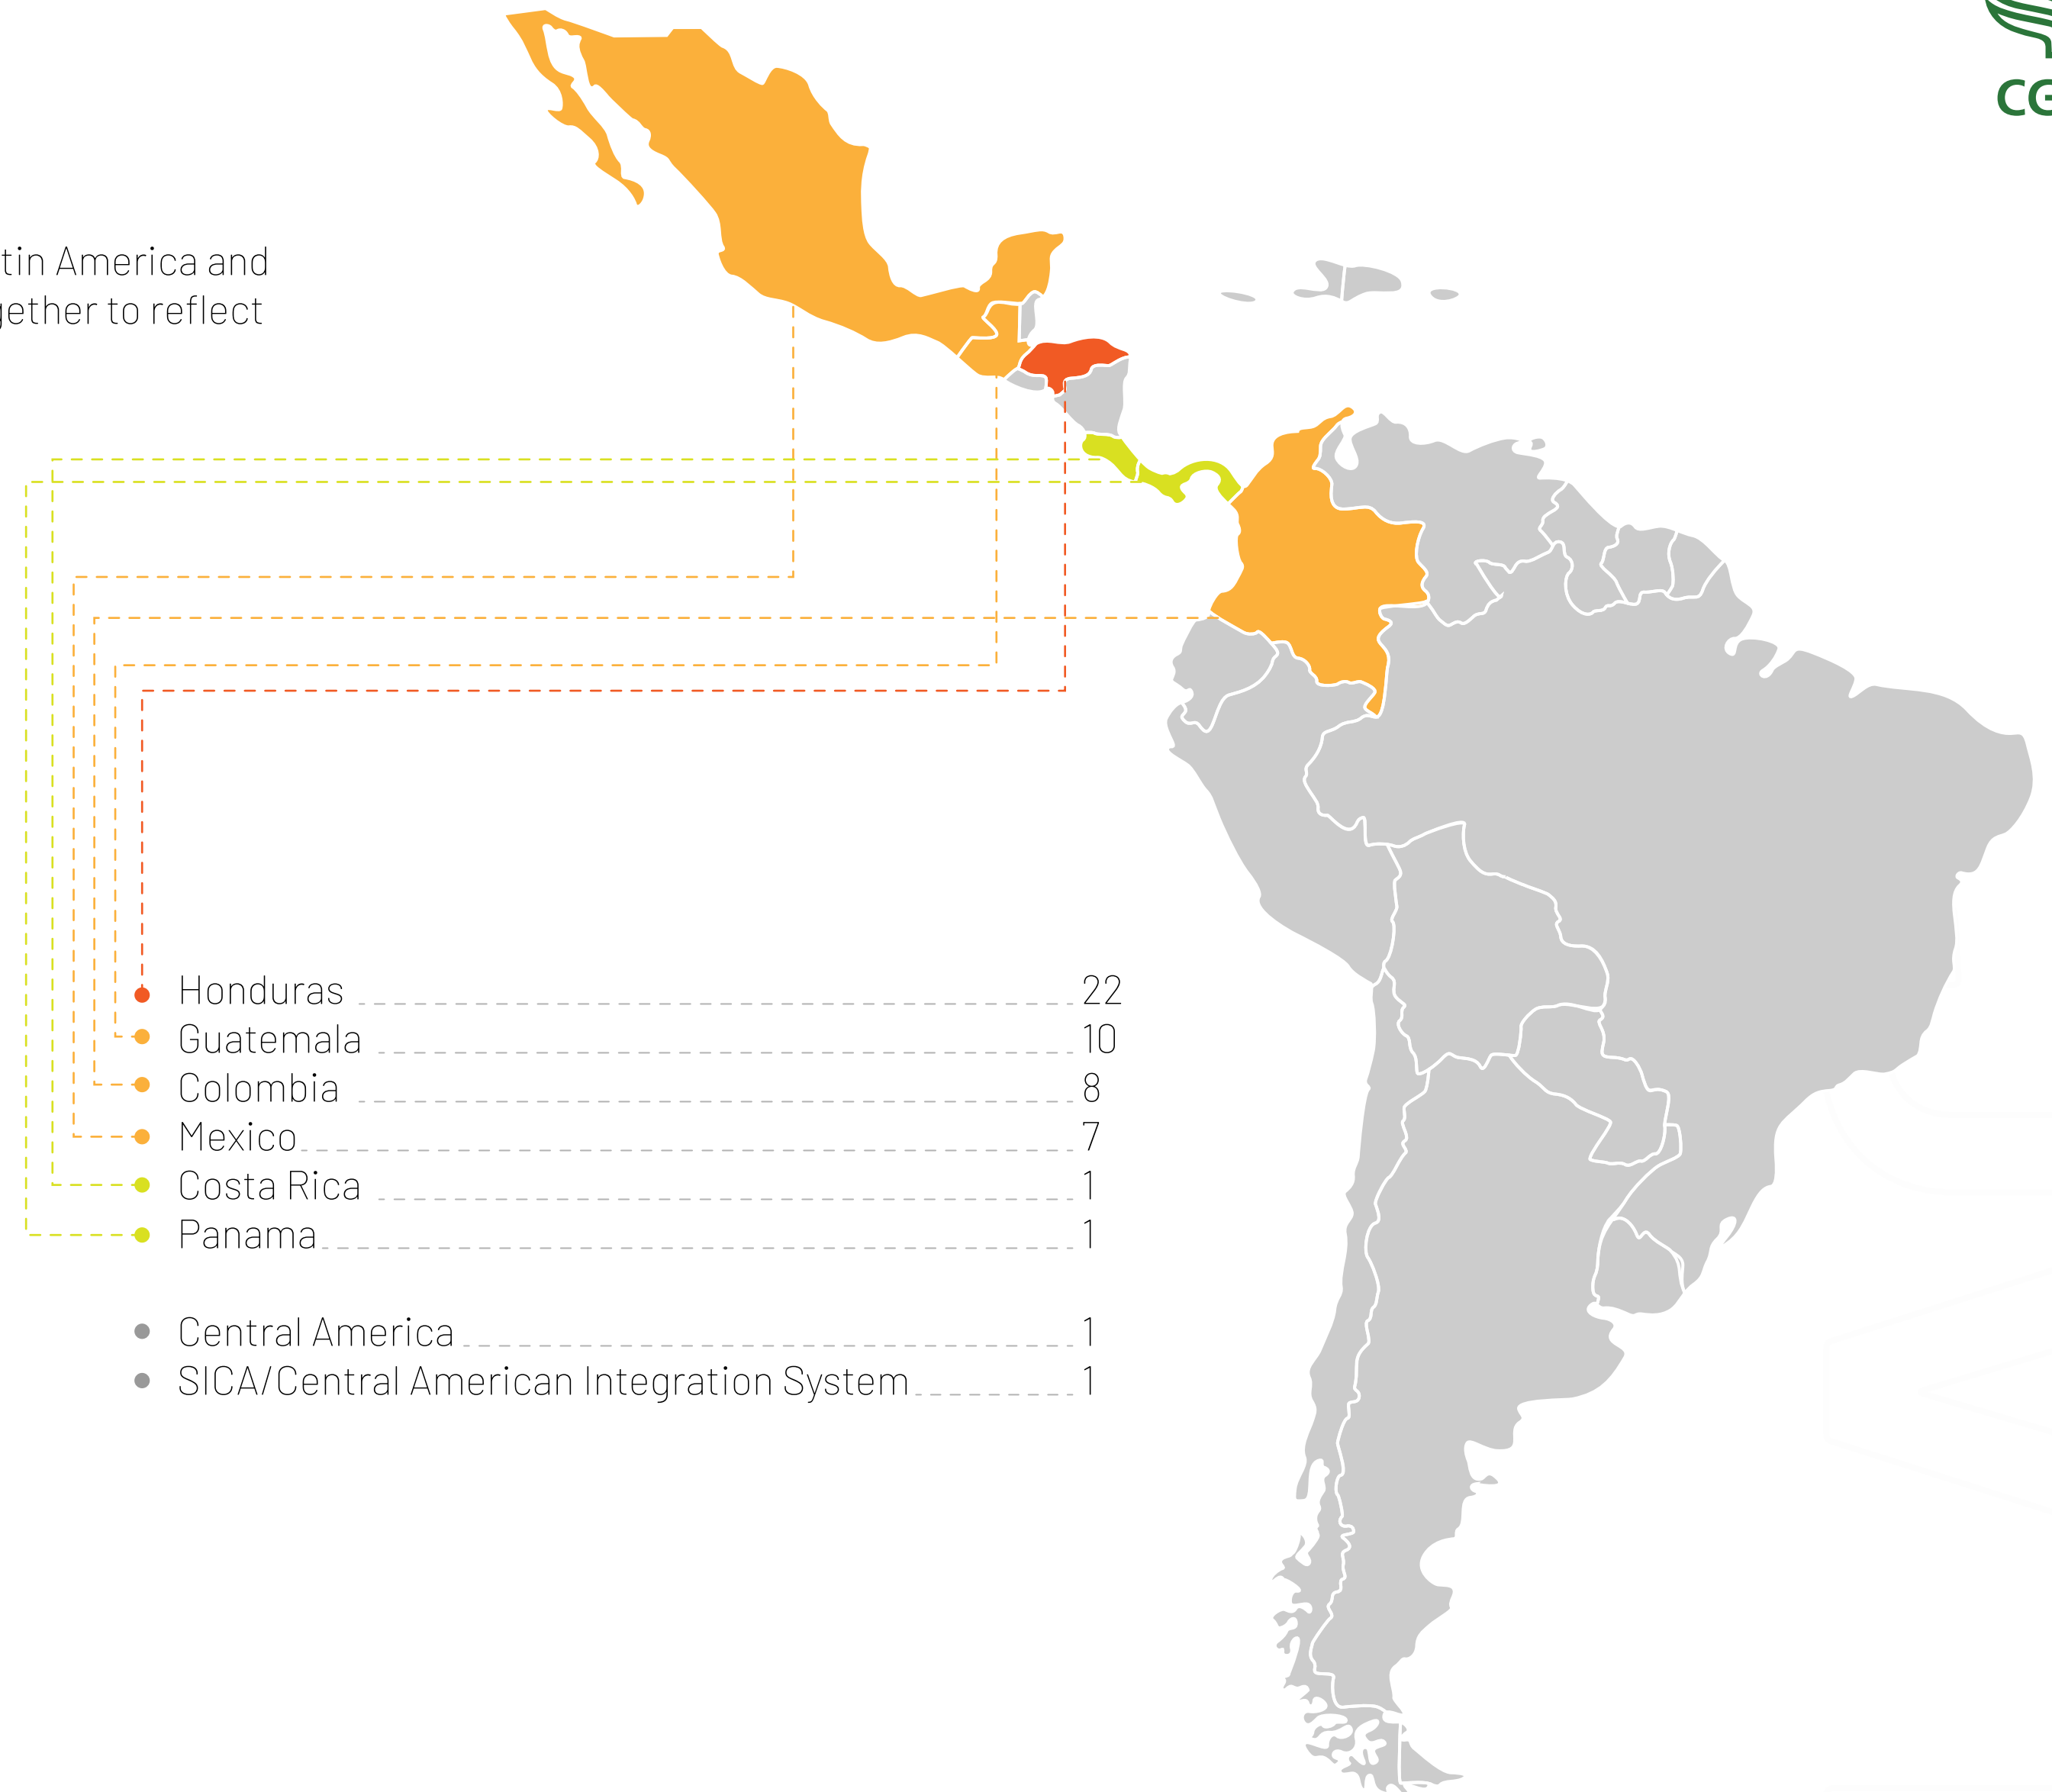

▶ Among them, organizations contributing **academically and through research:** Participation of universities and technical training centers.

▶ **Diversity of represented sectors,** such as:

- Local economic development
- Coffee and agroclimate,
- Technology and data
- Microfinance and rural trust
